Subject: RE: 2019 T30 Programmatic Sea Wall Patch Project - CERCLA Coordination

Hi Frank,

I've taken a look at the information you sent on the proposed work to patch the 1.5 inch hole in the sheet pile at T30. My understanding is that a steel plate will be welded to the sheet pile in order to cover the hole and that this work will be done in the dry. EPA has no objections to this proposal.

Thanks for coordinating with us.

Erika

Hi Erika and Justine,

As a part of special condition "j" of project NWS-2011-467-WRD we are requesting CERCLA coordination. Please let me know if you need any additional information.

Thank you,

Frank

Subject: [Non-DoD Source] 2019 T30 Programmatic Sea Wall Patch Project - CERCLA Coordination

Frank, please find attached details about some requested upcoming work located in Marine Area 1b do to some very minor sea wall patching. Per condition j of NWS-2011-00467-WRD please begin the CERCLA coordination for the 2019 T30 Programmatic Sea Wall Patch Project. Please accept this as satisfaction for condition j:

Condition j:

The permittee must provide site specific pre-construction information (number of piles to be removed and replaced, size of piles, type of piles, location of piles within the facility, etc) on all zones that overlap Superfund actions: Zones 1b and 2. This information must be provided to the U.S. Army Corps of Engineers, Regulatory Branch, Post Office Box 3755, Seattle, Washington 98124-3755, a minimum of 60 days prior to July 16 of any year this permit is valid to allow for coordination with Environmental Protection Agency (EPA) CERCLA Responsible Project Managers (RPMs). Pile replacement at these facilities may not be conducted until CERCLA coordination has been completed and the Port receives written approval to proceed from the Corps.
